02 PRESENT PROBLEMS 存在问题

一是在党建引领、学习贯彻党的二十大精神上有待深化。虽然党的建设为基金会高质量发展提供了坚强保障，但是在党务和业务平衡发展、共同提升上还有差距。诸如：党员干部的党性素养仍有待提升，对党的二十大精神的深学细研不够，理论联系实际的本领有待加强；从严治党意识和能力仍有不足，落实责任和传导压力上存在短板。

二是在创新驱动、全面贯彻新发展理念上有待加强。虽然基金会在改革创新上不断迈出步伐，但在创新出成果、创新出品牌、创新出效益上还需加大力度。尤其是：智慧引领不充分，在新技术的引入和应用上，还存在等待和观望的心理，很多时候“口号提的早、成果展现迟”；项目创新不迅速，面对新的变化还缺乏敏感度，不能第一时间与时俱进适应社会发展需求；公益收入提升不稳固，去年受突发自然灾害事件的影响，收入创历史新高，今年相应影响因素消失，整体收入较去年有所下降，未来收入水平的提升需要进一步贯彻新发展观念，寻找新的增长点。

三是在问题导向、补短板扬优势上有待提高。结合社会组织等级评估自查自纠、巡视整改要求和新一轮战略规划讨论研究，目前会内还有整体项目架构不够清晰、不同项目部门之间项目运作模式差异性较大、项目整体数据管理缺乏实化细化、志愿者广泛动员优质服务规范管理欠缺、公益生态建设能力尚待提升等不足，需要在今后的工作中切实加以改进和解决。

STAYING HARD-WORKING, REALISTIC AND PRAGMATIC FOR CHINA'S OVERALL AND HIGH-QUALITY ADVANCE IN POPULATION WELFARE IN THE NEW AGE

REPORT ON THE WORK OF THE CHINA POPULATION WELFARE FOUNDATION 2022 BY ZHAO BENZHI

Extinguished Wu Jiahua, the President of the China Population Welfare Foundation, fellow directors, supervisors, experts, and friends:

I will now report to you on the work of the Foundation in 2022 together with the work schedule for 2023 and ask for your deliberation and approval.

I. PROGRESS

2022 marked the 35th anniversary of the China Population Welfare Foundation (CPWF) and the change in the Board of Directors. It also witnessed affectionate attention from Li Jinhua, the head of the Foundation, deep concerns from the Party Group of the National Health Commission, direct leadership of Yu Xuejun, the deputy director, the competent guide from the Department of Personnel of National Health Commission as well as the Department of Population and Family of National Health Commission, coupled with the firm commitment and strong support from all directors, supervisors, and experts from the advisory committee. Under such a circumstance, the foundation stuck to Xi Jinping Thoughts on the Chinese-featured Socialism Ideology for a New Age and the driving force of Party development behind standardized, pragmatic, and efficient operation for outstanding and superior performance. We have snatched an annual turnover of RMB 448 million with expenditures up to RMB 461 million. Looking back on 2022, we made a steady improvement on all fronts such as internal governance, project exploitation, online crowd-funding, and the advancement of team and culture. Our untiring efforts were well recognized. In detail, the leadership team was rated excellent in the annual assessment of the organs affiliated with the National Health Commission. The Youth League Branch of CPWF won the title of "May 4th Red Flag Youth League Branch of the Organs Directly under National Health Commission for Years 2020-2022". The foundation won the third place in the 2022 China Charity Brand List of Southern Weekly. We won a perfect score in the China Foundation Transparency Index (FTI) in 2022. In addition, we received the following honors: "Model Foundations of the Year" in the 19th China Philanthropy List in 2022 of China Philanthropy Times; ranked in the Top Ten Chinese Public Welfare Foundations for the Year 2022. Our Village Doctor Support Program won the "Annual Health Public Welfare Project" award at the IFENG.COM Grand Health Summit. In particular, Song Hongyun, Deputy Secretary General of the Foundation, was awarded the "Philanthropist of the Year" at the 7th China Annual Conference on Philanthropy.

(I). FORGE COHESION BY REINFORCING THE LEADERSHIP OF THE PARTY

1. Consolidate ideological basis. We placed political study as the top part of regular sessions to strengthen the awareness of Party members and cadres. In particular, we underlined the popularization of the spirit of the 20th CPC National Congress through diversified educational campaigns combining intensified learning and self-study of party members. In this way, those Party members and cadres were in a good position to align their thoughts and actions with the party's decision-making and planning.

2. Constant improvement in the organizing capacity. We formulated and implemented a well-thought-out program for the Party development, such as a total of 73 meetings hosted by the Party branch, branch committee, and group as well as for Party lectures. Besides, the "Party Day" was celebrated for those members to better their role models for their contribution to the 20th CPC National Congress. The branch secretary also stood out to deliver the Party lecture, encouraging associated workshops, and sharing relevant experiences. Particularly, the application of a Party committee was incorporated into the new strategic planning of the Foundation when it is necessary. Concrete measures were taken to improve the collection and management of Party membership dues and standardize the recruitment of Party members. We boasted the recruitment of 2 probationary party members, the development of 2 candidates, and the identification of 4 activists of party application.

3. Innovative and fruitful work by the union and Youth League branch. As for the former which put into practice the Party-masses meeting mechanism and was led by the Party branch, a series of initiatives were launched as follows: the third "ME Development Program", the training on the performance and expertise of employees, the fourth annual Women's Day sharing meeting titled "Spring Blossoms, as Beautiful as You", the third sports meeting themed "Competition with Myself", as well as regular consumption promotions on products from poverty-stricken areas. When it came to the Youth League branch, remarkable activities were accomplished, including regular League member meetings, a book reading program that lasted for years to introduce a book to the members, an investigation on key little things, and a celebration ceremony on the 100th anniversary of the League.

4. Ongoing intensified supervision of the discipline and integrity of Party members and cadres. We remained committed to self-regulation and reflection for a strict discipline to assure our driving force for the growth in public health and welfare. In detail, leaders were convinced to sign the Letter of Commitment on the Improvement of Party Conduct to fulfill their responsibilities of being party members and regular administration. We worked to keep an eye on essential working steps to steer away from formalism, bureaucracy, hedonism, and extravagance, and to sound alarmed when it is necessary. To this end, we launched lectures on the integrity of Party members and a certain month themed highlighting the consequence of negative examples to popularize and supervise their activities.

5. All-round promotion in inspection and rectification. We clearly defined associated responsibilities, set up a task force for the inspection, selection, and deployment of officials for rectification, and convened a workshop for inspection and rectification. By doing so, solutions were put forward to determine a list and concrete steps

for rectification based on identified priorities. Specifically, 6 and 4 meetings were organized by the committee of the Party branch and the task force for the inspection and selection respectively to advance the work in order. Besides, we worked around the clock for the consolidation of the rectification, the acceleration of the progress for the task with a definite deadline, and continual supervision of the mission to be improved. In this way, we accomplished the work by the end of the year, timely submitted the feedback report, and opened it for public supervision.

(II). FURTHER INTERNAL GOVERNANCE TO LAY A SOLID FOUNDATION TO FORWARD PROGRESS

1. Change in the Board of Directors. The management of the foundation took the lead in vigorous negotiation and timely submission of an associated proposal to the National Health Commission and the Ministry of Civil Affairs for approval. Then we accomplished the election for the 7th Board of Directors through the combination of online and offline measures, establishing the Board of Supervisors and convening the first session for the board. By doing so, we standardized the record of the change in foundation members and supervisors.

2. Re-formulate strategic planning. A Strategic Planning Report for the Years from 2023 to 2027 was formulated after rounds of profound discussion among employees, directors, supervisors, experts, government leaders, social institutes, partner firms, and internal exchanges with the help of outside think tanks based on the evolving climate, an adjustment in macro policies, and the prospect of population welfare. The report aims to define appropriate functions and strategic purposes for the long run of the foundation and explore efficient, realistic, and pragmatic approaches for high-quality growth.

3. Constant fundraising through the Internet. A task force for online fundraising was set to hatch the capacity for establishing a basic framework of consultation. We managed to raise RMB 90.3054 million through a total of 44 online special initiatives such as a series of activities themed on "A Little Red Flower on Chinese New Year" and "A Little Red Flower on Women's Day for Caring Women", and public welfare initiatives of "Doing Good Together on May 20" and "99 Public Welfare Day".

4. Upgrade the information system. We stayed committed to the exploration and investment in one-stop systems for administrative examination and approval system, project management system, financial management system and archival electronic system. In addition, network security and ideological work were further standardized and nominalized through the nominalization of the operation of our website and social assistance platform for patients with serious diseases and the adoption of cloud monitoring services, such as Cloud Eye, Yundun, and terminal detection and emergency response.

5. Focus on brand building. We harnessed opportunities to popularize our achievements. In detail, the head of the foundation, one of the heads of class 5A foundations, was invited to share experiences on the approval, operation, upgrading, and maintenance of projects in a training course on the evaluation of social organizations held by the Ministry of Civil Affairs. In addition, a series of initiatives were launched to celebrate the 35th anniversary of the foundation, including soliciting associated articles, issuing relevant paintings and collections, convening workshops, and publishing a special edition. We upgraded our visual identity design and modified our office environment in compliance with the strategic planning of brand spread for the medium and long run. We stepped up the coordination to establish a task force for brand building, work through key project information against the China Charity Awards, and declare the social assistance platform for major diseases and the village doctors' support program for evaluation. Our information disclosure for the year 2022 passed the assessment by the ideological working group of the National Health Commission. Besides, we hosted 10 thematic initiatives, posted 150 tweets and 630 moments on our Weibo and WeChat respectively, 20 short videos, and 5 in-depth reports for the year 2022.

6. Solidly perform human resources work. We improved our institutions, formulating Interim Provisions on Staff Disciplinary and revising Administrative Procedures for Human Resources, the Measures for the Administration of Selection and Appointment, Administrative Procedures for Private Travel Abroad, Relief Measures for Employees with Special Difficulties, and other regulations. In addition, we strove for the standardization of daily management, the improvement in the procedures of open recruitment, retirement and departure, the security of staff salaries and benefits, the increase in their salary standards, the performance of monthly performance assessment, the organization of annual health check-ups, the payment of staff supplementary pension, and the relief of those employees and their child in difficulties, effectively solving various problems of employees. That's how we concretely helped the staff. Meanwhile, we also strengthened their education and training, organizing varied training courses at all levels and induction training for new employees and recommending the staff to attend the International Academy of Red Cross and Red Crescent and China Global Philanthropy Institute. In this way, we substantially raised the overall quality and professional qualification of cadres and staff.

7. Highlight services. We worked to maintain clear communication among the Board of Directors, Board of Supervisors, and Advisory Committee, coupled with closer ties with the National Health Commission and the Ministry of Civil Affairs. By doing so, we were in a good position to timely report our work news and achievements and publicize the highlights of the high-quality growth of population welfare. Besides, we pioneered the combination of service division, reception room, press conference hall, and security hall, and managed to nominalize qualified services through the organization of training on business etiquette, the improvement in employee code of conduct, the formulation of rules for reception work, the summarization of the reception work, meetings and press releases of various departments. What's more, we strictly put into practice the responsibility system for safe production, especially the arrangement of safety checks and emergency duty during holidays, daily risk identification and management, and the performance of the incentive mechanism of monthly reports, random, and mutual checks. Besides, safety campaigns were initiated to raise the safety consciousness of the staff.

(III)OPTIMIZATION OF PROJECT OPERATION AND CREATION OF NEW DRIVING FORCES

1. Consolidation of the achievements of poverty alleviation and promotion of rural revitalization. First, we have actively engaged with the Rural Revitalization Office of the National Health Commission and participated in relevant meetings and specific tasks. Currently, there is still an employee dispatched to assist in the work. Second, we have further played the role of the Health by Heart Fund. Third, full promotion of the project "Village Doctor". The needs of village doctors were comprehensively grasped by distributing survey questionnaires online to village doctors in 11 provinces including Guizhou City, of which nearly 50,000 copies were effectively collected; we have properly promoted the training of village doctors: a total of 14 offline training sessions and 25 online training sessions were conducted, with over 30,000 village doctors participating in the training; in the "Dragon Gate Dream Program", 220 village doctors were funded to obtain the qualification certificate of general practitioner assistant physician; a solicitation campaign for cases of Heart-warming Village Doctors was launched in 2022, and 696 outstanding cases of heart-warming village doctors, heart-warming deans and young role models were collected; we have put forward the Key Analysis Report on Improving the Quality of Rural Health Services in Central and Western China by relying on the professional strength of the health care system. Fourth, acceleration of the deepening reform of the Happiness Project. Project sites were set up in four provinces including Inner Mongolia, with an investment of RMB 7.54 million, which helped 195 mothers in need and benefited 585 people. A total of RMB 3.05 million was invested in the "Serving Farmers in Three Aspects" in 20 places to receive assistance including Jinzhai County, Anhui Province for the procurement of computers and other materials; women empowerment program was carried out in three provinces including Hunan, and 800 women received the training, 784 of whom were employed; the migrant women support program "Women Leaving Their Native Place" was launched, and more than 50 projects were reviewed; Shanyou Maternal and Infant Action donated 13 sets of equipment including cervical therapeutic instrument; we carried out the Happiness Project for Mother's Day and received RMB 16.57 million in donations from more than 10,000 cadres and workers from 164 central and state organs; we held a meeting of the Organizing Committee of the Happiness Project and demonstrated to the members the effectiveness of the transformation of the Happiness Project, which was highly appreciated by Director Gu Xiulian and Deputy Director Liu Ting. Fifth, active involvement in industrial construction. We were invited to join the Organizing Committee of the China Foundation Forum to host a parallel forum with the theme of "Gathering Social Forces to Build Healthy Villages in Multiple Ways", coordinate the participation of government officials, industry scholars, and social organizations in sharing relevant issues, explore rural basic medical and health services from the perspective of public welfare, think and summarize the participation of social organizations in the construction of healthy villages, and demonstrate the exploration, practice and experience in primary medical and health services, which has been viewed more than 100,000 times.

2. With the three major work sectors as the focus, integration and development were promoted simultaneously to promote the Healthy China Initiative. First, the tasks of the Healthy China Initiative were promoted. The Measures for the Administration of the Healthy China Initiative Fund was formulated and then forwarded by the Health China Initiative Promotion Office to each action team; the 2022 Healthy China Development Conference was organized, attended by Chen Zhu, Yu Xuejun and other leaders; the Symposium on the Healthy China Initiative Fund Project, Contribution Solicitation Conference and other working conferences were held for many times, and the leaders of the Committee, experts in various fields and more than 20 caring enterprises were invited to attend the meetings, which built a platform for co-construction and sharing of resources for all parties, and enterprises such as GSK and Feihe Dairy are mobilized to donate more than RMB 3 million. Second, stimulation of the vitality of China's social assistance platform for serious diseases. During the year, we raised RMB 80,534,000 and helped 1,521 patients with serious diseases. Four new funds were established throughout the year: Safe Riding Foundation, Medical Innovation Fund, New Hope Fund, and Shanghai Family Planning Association Family Development Fund, with a total amount of over RMB 20 million. The fields and groups covered have been expanded and improved.

II. PRESENT PROBLEMS

First, it still needs to be deepened in guiding the Party building, learning and implementing the spirit of the 20th CPC National Congress. Although the Party building has provided a strong guarantee for the high-quality development of the Foundation, there is still a gap in the balanced development and common improvement of the Party affairs and business. For example, the Party spirit and quality of Party members and cadres still need to be improved, the in-depth study of the spirit of the 20th CPC National Congress is insufficient, and the ability to integrate theory with practice needs to be strengthened; the awareness and ability of rigorous governance over the Party are still insufficient, and there are shortcomings in fulfilling responsibilities and disseminating pressure.

Second, innovation-driven development and comprehensive implementation of the new development philosophy need to be strengthened. Although we have continuously taken steps in reform and innovation, it still needs to increase efforts in innovation to produce results, brands, and benefits. In particular, the guidance of wisdom is insufficient, and there is still a wait-and-see mentality in the introduction and application of new technologies. In many cases, "slogans are raised early, results are presented late"; project innovation is not rapid and lacks sensitivity in the face of new changes, unable to keep pace with the times to meet the needs of social development; the increase in public welfare revenue is not stable: revenues hit a record high last year due to the sudden impact of natural disasters. This year, the influencing factors disappeared, and the overall income declined compared with last year. The improvement of income level in the future requires further implementation of new development concepts and the search for new growth points.

Third, there is still room for improvement in terms of problem orientation, fostering strengths, and reinforcing weaknesses. Based on social organization level assessment, self-inspection and correction, inspection and rectification requirements, and the new round of strategic planning discussions, there are still shortcomings within the Foundation, such as unclear overall project architecture, significant differences in project operation modes between different project departments, lack of practical and detailed overall data management of projects, standardized management of the extensive mobilization of high-quality services for volunteers, and capacity for public ecological construction, which need to be effectively improved and resolved in the future.

III. FURTHER ARRANGEMENT

(I) GENERAL THINKING

The year 2023 is the first year for fully implementing the guiding principles of the 20th CPC National Congress and the new round of strategic planning of CPWF. CPWF will fully implement the spirit of the 20th CPC National Congress under the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, and adhere to the general tone of pursuing progress while ensuring stability, the purpose of "promoting population welfare and family happiness", the grand vision of "everyone and every family are happy, and everyone and every family are philanthropists" and the core value concept of "wholeheartedly serving donors, volunteers, and recipients"; centering on major decisions and arrangements such as "comprehensively promoting the construction of a healthy China", "rural revitalization", "establish a policy system to boost birth rates", "pursuing a proactive national strategy in response to population aging", and "improving the population development strategy", we will give full play to the role of the "tertiary distribution" in promoting common prosperity, focusing on our main businesses, and creating brand projects; promote high-level international development and organically combine "bringing in" and "going out"; gradually strengthen cross-department linkage, consolidate and deepen the organizational culture of "home and harmony", and build a dynamic ecological organizational structure; strengthen service and management awareness, form a joint force to jointly promote high-quality development, and make new and greater contributions to the development of population welfare undertakings and charity industries, as well as to the construction of a modern socialist country in an all-round way.

(II) Main Objective

The total annual revenue will reach RMB 410 million, including RMB 260 million in cash and RMB 150 million in materials; with the expenditure no less than 70% of the previous year. The relevant operational indicators are maintained within a reasonable range, new breakthroughs in Internet fund-raising are achieved, internal governance is upgraded, high-quality institutional platforms and organizational ecology are developed, and a high ranking of transparency and comprehensive evaluation indexes is maintained.

(III). Key Work

1. Enhance the leadership of the Party through Party building. We

strove to prepare for the establishment of a Party branch committee and underline the core engine of the Party behind the high-quality growth of the foundation through the following measures: Intensified party education, the popularization of the spirit of the 20th CPC National Congress, the practice of the system of holding Party branch general meetings, meetings of Party branch committees, Party group meetings, and Party lectures, the themed campaigns to celebrate the Party day, and special seminars. By doing so, we also consolidated the outcome of Party education, launching studying crazes and advancing Party building. What's more, we strictly followed the principle of the leadership of the Party over cadres, broadening the path of young employees' success and developing a high-quality professional team. Besides, we intensified discipline and the performance of rules and regulations to raise the self-discipline of party members. Coupled with their fulfillment of administrative responsibilities and their role in Party building, that's how we exerted veto power in terms of ideology, discipline supervision, standardized practice, integrity, safety production, confidentiality, and other aspects.

2. Increase the driving force of the Party branch for a better industry platform-type institution. We stressed health and happiness for high-quality growth. To this end, we worked to leverage the strength of the health system and stay on our main responsibilities, exploring the strategic issues of infants, children nursing, and the elder and intensifying the strategic action of emergency normalization for the emphasis on our mission and strategic positioning. To underline the development of the platform, we domestically strove for closer ties with healthcare network partners, such as China Family Planning Association, China National Committee on Ageing, and the Maternal and Child Health Hospital, to consolidate the infrastructure of the public welfare and charity industry, securing platform resources and achieving cohesion and common development. Internationally, we strengthened cooperation around the globe, attempting to international strategic layout and continuing to go global. With participation in the "Belt and Road Initiative", we worked to accelerate the process, contributing to the improvement of global public health conditions and medical services.

3. Strengthen the internal hard power by focusing on the optimization of the organizational structure, ecological, and talent assurance systems. We managed to put into practice the "one plan" and the strategic planning for the year 2023-2027, sticking to the combination of top-level design and full participation through coordinated deployment and progressive advancement for the upgrade in the internal governance structure, organizational ecological, and talent assurance systems. Besides, we stressed the constant reinforcement of our technology and culture. In detail, the former aimed to the promotion in the organic integration and interplay among the administrative system, financial system, and project system while the latter was supposed to consolidate the culture of "home and harmony" and integrate it into the cultural connotation of innovation and endless struggle. In this way, we perfected our incentive mechanism, stressing performance assessment for high quality and efficiency and encouraging healthy competition, the unity of the team, and an enterprising spirit. Besides, we also poured energy into the service for management, grassroots, and the public ("three services"). We were committed to integrating the values of wholeheartedly "serving donors, volunteers, and recipients" with the organizational culture, visualizing the ideology, and accelerating the development of the "service division, reception room, press conference hall, and security hall". In this way, we achieved the improvement in the internal and external service capability and standards and the development of a work team with a strong sense of the big picture and responsibility, and qualified service.

4. Expand our social influence with a focus on the improvement in the recognition and reputation of our organization and projects. We stressed industry credibility by actively participating in the development of industrial infrastructure, strengthening professional exchanges and cooperation, promoting joint actions on issues, and supporting the development of the charity industry and partners in the public welfare industry. Besides, we highlighted public participation by keeping raising funds online, expanding interfaces for public interaction and involvement, broadening fundraising channels, and enriching donation approaches for a lower threshold of donation. We also emphasized social approval by keeping the publication of major events, donation amounts, project information, and the use of funds through our website, Weibo, WeChat, the journal and China Charity Information Platform, social organizations network, and other media platforms. In this way, we strove for sound platform management and information disclosure and open for public supervision. In addition, we valued brand communication by innovating publicity channels and promoting projects on major time nodes such as International Family Day, World Population Day, and Doctor's Day. We believe that constant efforts facilitate our public approval.

(IV). Safeguard Measure

In order to give full play to the governance and supervision of the Board of Directors, Board of Supervisors, and Advisory Committee, as well as the function of think tank functions and effectiveness, the leadership group and executive team vow to achieve closer communication with the above boards and expert members and optimize services. By doing so, we strive to identify the strategic direction, allocate key resources, and establish supervision mechanisms based on the new development stage. That's how we achieve sustainable and high-quality growth of population welfare.
We strive for a sound system and clarified responsibilities and obligations. To this end, we work to better the working mechanism of the Board of Directors to revitalize its functions and increase its contribution to governance. Besides, we clearly define the responsibilities of the Board of Supervisors to ensure safety supervision against project risks. In addition, we unleash the effectiveness of the Advisory Committee as a think tank to share experiences and broaden decision-making thinking.

Perfect the service mechanism and better communication and coordination. We pledge to increase information sharing, regularly briefing directors, supervisors, and experts in an appropriate way to update them on our current development status and required support. In exchange, we encourage their involvement in institutional strategic planning, brand promotion, project justification, fundraising, value preservation and appreciation, and team growth with their respective backgrounds and strengths. In this way, we strive to offer better services of government affairs, affairs, legal affairs, business, finance, conference services, and labor services. What's more, we work to establish a one-to-one communication mechanism led by the Secretary-General under the general supervision of the chairman and practiced by the team members and the heads of the internal departments. In this way, we are in a good position to prepare for meetings for the Board of Directors, Board of Supervisors, and Advisory Committee, fuel communication during the meetings, and collect feedback after them. That's how we raise the efficiency and quality of decision-making of the divisions.

We value gratitude and feedback and aspire to forge ahead with joint efforts. Specially, we regularly update the National Health Commission and the Ministry of Civil Affairs with the promotion and publicity of the achievements and honors of directors, supervisors, and consulting experts. In addition, an update on the institution is expected to be timely delivered to the public charity industry as well as the organizations where directors, supervisors, and consulting experts work. Besides, we pledge to pave the way for social events in additionl to meetings, inviting more directors, supervisors, and expert members to get acquainted with each other and hold hands for common prosperity.

With the massive support from our directors, supervisors, experts, and commissioners, we are determined and confident to lay a solid foundation for a time-honored foundation and contribute to the high-quality development of public charity in a hard-working, realistic, and pragmatic way.

Thank you!

PROJECT HAPPINESS
幸福工程

1995 年 2 月，“幸福工程—救助贫困母亲行动”在彭珮云、王光美等国家领导人和爱心人士的倡导推动下，由中国人口福利基金会、中国计划生育协会、原中国人口报社联合发起，以“治穷、治愚、治病”为内容，以“小额资助、滚动运作、直接到人、劳动脱贫”为模式，目的是为改变农村贫困母亲的生活环境和生活状态，让贫困母亲经济上得实惠、生活上多保障、社会上有地位。

随着我国经济水平提升和扶贫力度加大，贫困人口数量逐年减少，绝对贫困人口实现全面脱贫，幸福工程最初的使命已基本完成。为了适应新形势，解决新问题，2020 年，项目积极转型升级，更名为“幸福工程”，项目宗旨变更为“帮助困境母亲，建设幸福家庭”，帮扶对象由“贫困母亲”扩展为“困境母亲”，通过“多元帮助，精准到人，扶持带动，防止返贫”的帮扶模式，为困境母亲和家庭在“扶弱济困、扶智赋能、扶助健康”方面提供帮助，继续助力巩固脱贫攻坚成果同乡村振兴有效衔接，促进共同富裕。幸福工程开展 27 年来，得到各级政府、百姓的高度认可，在围绕困境母亲及家庭的发展致富、提升女性健康水平、提升女性自我发展能力等方面，做了大量有益的工作，取得了显著成效。

2022 年，幸福工程项目收入 3657.9 万元，支出 1314.6 万元。在内蒙古自治区武川县、新疆维吾尔自治区鄯善县、云南省宣威市等地设立 5 个滚动运作项目点，开展手工业加工、种养殖等项目；在湖南省长沙市、内蒙古自治区喀喇沁旗、贵州省遵义市开展“妇女赋能培训项目”，提高妇女职业技能；“幸福工程—善佑母婴行动”项目向 13 家医院捐赠 15 台（套）导乐、宫颈治疗仪等设备；“三下乡”活动投入帮扶资金 305 万余元，为安徽省金寨县等 20 个项目点采购电脑设备、文体用品、卫生用品、农业设备等物资；疫情期间，第一时间支援西藏防疫抗疫行动，捐赠价值 30 万元的应急防疫物资。2022 年，共帮扶困境母亲 5000 余人。

截至 2022 年底，已在 29 个省的 965 个项目点开展过项目救助，累计投入资金 22.85 亿元，帮扶困境母亲 36.36 万人，惠及人口 153.86 万人。

In February 1995, “Progect Happiness - Helping Mothers in Poverty” was jointly initiated by China Population Welfare Foundation, China Family Planning Association and the former China Population Newspaper under the advocacy and promotion of national leaders and caring people such as Peng Peiyun and Wang Guangmei, with the content of “treating poverty, treating fools and treating diseases” and the model of “small grants, rolling operation, direct access to people and labor to get rid of poverty”, aiming at changing the living environment and living conditions of impoverished rural mothers, so that impoverished mothers can get economic benefits, have more security in life and have a position in society.

With the improvement of China’s economic level and the intensification of poverty alleviation, the number of impoverished people has decreased year by year, and the absolutely impoverished people have been lifted out of poverty in an all-round way. Therefore, the initial mission of the Programme of Happiness has been basically completed. In order to adapt to the new situation and solve new problems, the programme was actively transformed and upgraded, and renamed “Programme of Happiness” in 2020. The purpose of the programme was changed to “helping mothers in distress and building happy families”, and the target of assistance was expanded

from “impoverished mothers” to “mothers in distress”. Through the help model of “diversified help, accurate to people, support and promotion, and prevention of returning to poverty”, mothers and families in distress obtained help in “helping those in distress, helping education, and helping health”, thus continuing to help to consolidate the effective link between achievements of poverty alleviation and rural revitalization to promote common prosperity. Programme of Happiness has been highly recognized by governments at all levels and people since it was launched 27 years ago. It has done a lot of useful work and achieved remarkable results in making distressed mothers and families rich, improving women’s health level and enhancing women’s self-development ability.

In 2022, the income of the Programme of Happiness was RMB 36.579 million, and the expenditure was RMB 13.146 million. 5 rolling operation project sites were set up in Wuchuan County, Inner Mongolia Autonomous Region, Shanshan County, Xinjiang Uygur Autonomous Region and Xuanwei City, Yunnan Province to carry out handicraft processing, breeding and other projects; “Women’s Enabling Training Program” was carried out in Changsha City, Hunan Province, Harqin Banner, Inner Mongolia Autonomous Region and Zunyi City, Guizhou Province to improve women’s vocational skills; The “Programme of Happiness -Shanyou Maternal and Infant Action” project donated 15 sets of Doula, cervical therapeutic apparatus and other equipment to 13 hospitals; the “Serving Farmers in Three Aspects” invested more than RMB 3.05 million to purchase computer equipment, cultural and sports supplies, sanitary products, agricultural equipment and other materials for 20 project sites including Jinzhai County, Anhui Province; during the epidemic period, the action of supporting Tibet’s efforts to prevent and fight against the COVID-19 epidemic was immediately launched and emergency epidemic prevention materials of RMB 300,000 were donated. More than 5,000 mothers in distress were helped in 2022.

By the end of 2022, project assistance has been carried out in 965 project sites in 29 provinces, with a total investment of RMB 2.285 billion, helping 363,600 mothers in distress and benefiting 1,538,600 people.

健康援助 - 联心助医计划

自党的十八大以来，我会在国家卫生健康委扶贫办的直接指导下，自觉承担起健康扶贫历史重任，面向全国连片特困地区组织实施“健康暖心”工程，通过“一免三助”运作模式，即免费发放常备药物及营养品，普及健康知识，提高群众健康素养；资助大病患者，减轻医疗负担；资助基层医疗机构，改善医疗装备条件；资助基层县级医院及乡镇卫生院医生，提高医疗服务能力。联心助医是资助基层医疗机构，改善医疗装备条件的重要内容，我会通过 2014-2015 年在吕梁山片区贫困县的多次调研中发现，贫困地区卫生医疗条件差，水平低，因看病难而跨区就医，致近一半的家庭因病致贫、因病返贫。因此，改善贫困地区基层医疗装备条件，提升医疗服务水平，引导患病群众就近就医，降低患者异地就医的医疗成本，防止因病致贫、因病返贫成为联心助医项目的工作重点。

健康援助基层医疗装备联心助医计划，自 2015 年项目实施以来，始终秉持公益捐赠的“自愿”和“无偿”原则，将当年捐赠设备名录公开发布在中国人口福利基金会官网，2022 年共向 92 家医院、医疗机构，捐赠医疗设备 393 台（套），总价价值 1.75 亿元。

Since the 18th National Congress of the Communist Party of China, under the direct guidance of the Poverty Alleviation Office of the National Health Commission of the People’s Republic of China, we consciously shoulder the historical responsibility of health and poverty alleviation, organize and implement the “Health by Heart” Program for contiguous destitute areas across China, and adopt the

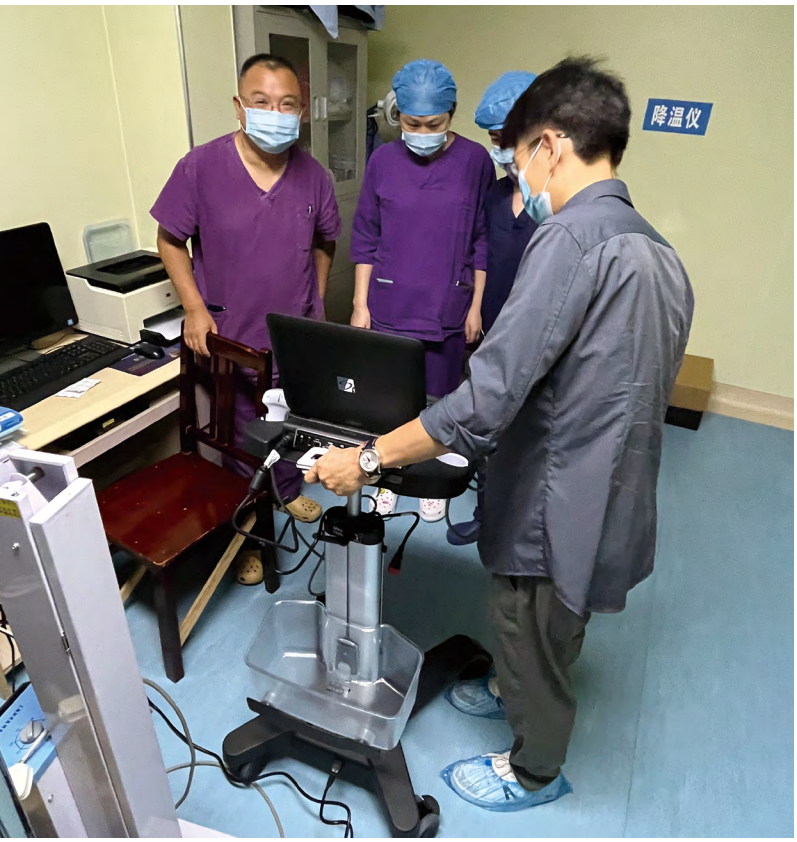
operation mode of “One Free and Three Guarantees”: distribute standing drugs and nutrients free of charge, popularize health knowledge and improve people’s health literacy; subsidize seriously ill patients and reduce their medical burden; subsidize primary medical institutions and improve medical equipment conditions; subsidize doctors in grass-roots county-level hospitals and township health centers and improve their medical service capabilities. “Health Assistance – Medical Equipment Assistance Project for Primary-level Medical Institutions” is an important part of funding primary medical institutions and improving medical equipment conditions. Through many investigations in poverty-stricken counties in the Lvliang Mountain area in 2014-2015, we found that the health care conditions in poverty-stricken areas are poor and the level is low, and it is difficult to see a doctor and people can only seek medical treatment across regions, resulting in nearly half of the families being poor and returning to poverty due to illness. Therefore, improving the conditions of primary medical equipment in poverty-stricken areas, improving the level of medical services, guiding the sick people to seek medical treatment nearby, reducing the medical cost of patients seeking medical treatment in different places, and preventing poverty caused by illness and returning to poverty due to illness have become the focus of the Program.

Since the implementation of the Program in 2015, the Program has always adhered to the principles of “voluntary” and “free” donation, and the list of donated equipment in that year is publicly released on official website of the China Population Welfare Foundation. In 2022, 393 sets of medical equipment were donated to 92 hospitals and medical institutions, with a total price of RMB 175 million.



2013 年 10 月起，由国家卫生健康委发起、中国人口福利基金会负责组织实施的“健康暖心”工程在全国连片特困地区开展，通过“一免三助”的健康帮扶模式，重点支持“两不愁三保障”和产业帮扶，协助部分重点帮扶县打赢脱贫攻坚战。2021 年，脱贫攻坚战胜利后，继续协助部分帮扶县巩固脱贫成果，全面推进乡村振兴。

2022 年，健康暖心工程支持定点帮扶县 241.93 万元。项目围绕县域发展需求，深入开展产业帮扶，努力促进定点帮扶县脱贫人口就业。同时，持续提升县医院服务能力，助推现代医院管理制度建设，推进公立医院改革。此外，还注重改善人居环境，持续开展路灯亮化工程、维修饮水设施及采购取暖设备，建设老年健康活动中心及办公场所，保障居民日常生活，提升生活幸福感。

Since October, 2013, the “Health by Heart” Program, initiated by the National Health Commission and organized by the China Population Welfare Foundation, has been carried out in the country’s contiguous special hardship areas, focusing on supporting the development of “Two Assurances and Three Guarantees” (Rural poor people are free from worries over food and clothing and have access to compulsory education, basic medical services and safe housing.) and poverty alleviation industries through the health assistance model of “One Free and Three Guarantees”. After winning the battle against poverty in 2021, the program will continue to assist some of the counties to consolidate the results of poverty eradication and continue to promote rural revitalization.

In 2022, the “Health by Heart” Program supported RMB 2,419,300 to help the counties. Focusing on the needs of county development, the Program carried out in-depth industrial assistance and strived to promote the employment of poverty-stricken people in designated counties. At the same time, the Program continued to improve the service capacity of county-level hospitals, and promoted the construction of a modern hospital management system, and the reform of public hospitals. In addition, the Program also paid attention to improving the living environment, continuing to carry out street lighting works, maintaining drinking water facilities and purchasing heating equipment, and building elderly health activity centers and offices to ensure residents’ daily life and enhance their happiness.

中国人口福利基金会为了更加及时、有效地参与自然灾害救助，履行社会组织职责，于 2013 年 4 月内部设立的专项基金，依照《中国人口福利基金会自然灾害应急预案》开展工作。多年来，自然灾害救助基金围绕中心、服务大局，以次生灾害紧急援助和帮助灾区灾后重建为主要内容，以应急救援为急务、以防疫消杀和灾后重建为重点，统筹各项目及专项基金力量，为恢复和保障灾区群众的安全、健康作出了应有贡献。在 2013 年的雅安地震和 2014 年的鲁甸地震赈灾活动中，自然灾害救助基金分别募集、捐赠款物 4020 万元、116 万元，帮助灾区人民恢复生产，重建家园。2022 年，筹集善款 57.8 万元助力四川省雅安市、甘孜州地震灾后卫生防疫工作。

The China Population Welfare Foundation established a special fund in April 2013, in order to participate in natural disaster relief in a more timely and effective manner, fulfill its social organization responsibilities, and carry out work according to the China Population Welfare Foundation's Emergency Response Plan for Natural Disasters. Over the years, the Natural Disaster Relief Fund has focused on secondary disaster relief assistance and helping with post-disaster reconstruction in order to serve the overall situation. With emergency rescue as the top priority, and pandemic prevention, disinfection, and post-disaster reconstruction as key areas, the fund has coordinated the efforts of various projects and special funds to make necessary contributions towards restoring and protecting the safety and health of the disaster-affected people. In the 2013 Ya'an earthquake and the 2014 Ludian earthquake relief activities, the Natural Disaster Relief Fund raised and donated a total of RMB 40.2 million and RMB 1.16 million in goods and materials respectively, helping people in the disaster-affected areas to resume production and rebuild their homes. In 2022, the fund raised RMB 578,000 to support post-earthquake health and pandemic prevention work in Ya'an City and Ganzi Prefecture, Sichuan Province.

Respect the Elderly and Love the Young Family Development Fund
尊老爱幼家庭发展基金

尊老爱幼家庭发展基金，成立于 2021 年，由北京大学国家发展研究院曾毅教授和中国人口与发展研究中心特聘研究员王正联博士共同发起，旨在提倡和鼓励三代同堂或老人与子女紧邻居住的代际互助家庭模式，以试点和实践项目案例建议社会各界为老人与已婚子女同住或紧邻居住家庭提供精神奖励和适当经济补贴，努力把正在逐渐失落的家庭价值观找回来，促进国家发展和改善亿万家庭福祉。

2022 年，基金首批资助的 11 个“尊老爱幼代际互助促进家庭发展”试点实践项目在上海、浙江安吉、福建厦门、江西崇义、河南开封、广东深圳、山东威海、济宁和潍坊等地顺利开展，并如期完成中期评审。

Foundation of Respecting Aged, Caring for Young and Family Development, established in 2021, was initiated by Professor Zeng Yi of the National School of Development, Peking University and Dr. Wang Zhenglian, Distinguished Research Fellow of China Population and Development Research Center. The fund aims at promoting and encouraging the inter-generational mutual help model featuring three generations living together or the elderly living next to their children. Through pilot projects and cases, it suggests the society to provide moral encouragement and appropriate financial subsidies for families with the elderly living with married children or those living next to each other. Such efforts are made to bring back the family values that are gradually being lost, promote national development and improve the well-being of hundreds of millions of families.

In 2022, the first batch of 11 pilot projects funded by the Fund for "Promoting Family Development through Inter-generational Mutual Assistance and Respecting the Elderly and Caring for the Young" were successfully launched in Shanghai City, Anji County in Zhejiang Province, Xiamen City in Fujian Province, Chongyi County in Jiangxi Province, Kaifeng City in Henan Province, Shenzhen City in Guangdong Province, Weihai City, Jining City and Weifang City in Shandong Province, and the midterm evaluation was completed on schedule.

AUDIT REPORT
审计报告

审 计 报 告

中证天通（2023）审字 21110151 号

中国人口福利基金会：

我们审计了后附的中国人口福利基金会财务报表，包括 2022 年 12 月 31 日的资产负债表，2022 年度的业务活动表、现金流量表以及相关财务报表附注。

一、审计意见

我们认为，后附的财务报表在所有重大方面按照《民间非营利组织会计制度》的规定编制，公允反映了中国人口福利基金会 2022 年 12 月 31 日的财务状况以及 2022 年度的业务活动成果和现金流量。

二、形成审计意见的基础

我们按照中国注册会计师审计准则的规定执行了审计工作。审计报告的“注册会计师对财务报表审计的责任”部分进一步阐述了我们在这些准则下的责任。按照中国注册会计师职业道德守则，我们独立于中国人口福利基金会，并履行了职业道德方面的其他责任。我们相信，我们获取的审计证据是充分、适当的，为发表审计意见提供了基础。

三、其他信息

中国人口福利基金会管理层对其他信息负责。其他信息包括年度工作报

告中涵盖的财务信息，但不包括财务报表和我们的审计报告。

我们对财务报表发表的审计意见不涵盖其他信息，我们也不对其他信息发表任何形式的鉴证结论。

结合我们对财务报表的审计，我们的责任是阅读其他信息，在此过程中，考虑其他信息是否与财务报表或我们在审计过程中了解到的情况存在重大不一致或者似乎存在重大错报。

基于我们已执行的工作，如果我们确定其他信息存在重大错报，我们应当报告该事实。在这方面，我们无任何事项需要报告。

四、管理层和治理层对财务报表的责任

中国人口福利基金会管理层（以下简称管理层）负责按照《民间非营利组织会计制度》的规定编制财务报表，使其实现公允反映，并设计、执行和维护必要的内部控制，以使财务报表不存在由于舞弊或错误导致的重大错报。

在编制财务报表时，管理层负责评估中国人口福利基金会的持续经营能力，披露与持续经营相关的事项，并运用持续经营假设，除非管理层计划清算中国人口福利基金会、终止运营或别无其他现实的选择。

中国人口福利基金会治理层负责监督中国人口福利基金会的财务报告过程。

五、注册会计师对财务报表审计的责任

我们的目标是对财务报表整体是否不存在由于舞弊或错误导致的重大错报获取合理保证，并出具包含审计意见的审计报告。合理保证是高水平的保证，但并不能保证按照审计准则执行的审计在某一重大错报存在时总能发现。错报可能由于舞弊或错误导致，如果合理预期错报单独或汇总起来可能影响

财务报表使用者依据财务报表作出的经济决策，则通常认为错报是重大的。

在按照审计准则执行审计工作的过程中，我们运用职业判断，并保持职业怀疑。同时，我们也执行以下工作：

（1）识别和评估由于舞弊或错误导致的财务报表重大错报风险，设计和实施审计程序以应对这些风险，并获取充分、适当的审计证据，作为发表审计意见的基础。由于舞弊可能涉及串通、伪造、故意遗漏、虚假陈述或凌驾于内部控制之上，未能发现由于舞弊导致的重大错报的风险高于未能发现由于错误导致的重大错报的风险。

（2）了解与审计相关的内部控制，以设计恰当的审计程序，但目的并非对内部控制的有效性发表意见。

（3）评价管理层选用会计政策的恰当性和作出会计估计及相关披露的合理性。

（4）对管理层使用持续经营假设的恰当性得出结论。同时，根据获取的审计证据，就可能导致对中国人口福利基金会持续经营能力产生重大疑虑的事项或情况是否存在重大不确定性得出结论。如果我们得出结论认为存在重大不确定性，审计准则要求我们在审计报告中提请报表使用者注意财务报表中的相关披露；如果披露不充分，我们应当发表非无保留意见。我们的结论基于截至审计报告日可获得的信息。然而，未来的事项或情况可能导致中国人口福利基金会不能持续经营。

（5）评价财务报表的总体列报、结构和内容（包括披露），并评价财务报表是否公允反映相关交易和事项。

我们与治理层就计划的审计范围、时间安排和重大审计发现等事项进行

沟通，包括沟通我们在审计中识别出的值得关注的内部控制缺陷。
